Description

<http://board.jdownloader.org/showthread.php?t=53240>

"Now Downloading without bubble (a bigger rar, to see what happens precisely), I see that during extract at first ACTIVE TASK contains "Extraction running", a little bit later ACTIVE TASK, ETA and PROGRESS contains equally "Extracting", and at the end of extract ACTIVE TASK contains Extraction OK, ETA is empty, and progress is again 100%.

When bubble is active, I see a running time, what file is extracted, and the state-extracting/successful.

I ask to fill ETA and PROGRESS, when bubble is disabled.

ETA could contain the running time of bubble, progress could contain a calculated value, an estimate, for example the actual extracted file # / total # of files of archive, for example "1/32", "2/32", ... "32/32". "
