<b>Target version:</b>	030 - Version > 2.xxx		
<b>Resolution:</b>			

#### Description

Yesterday I had this idea:

We have the "shutdown after download" feature.

Most people will probably use it to download over night and "save energy" afterwards.

But what, if there are major problems with the ISP/server/account/whatever and JD just can't make any progress?

I think it would be a good idea to be able to define a time after which in this case, JD shuts down the pc anyway because it makes no sense to leave it running...that's my opinion at lest ;)
