Target version: 020 - Next Release 2.0	
Resolution: Fixed	
Description Currently, JDunrar plugin can move finished files from their download directory to a different directory. This capability does not exist for other downloads (avi, HJsplite, and so on). It is recommended that the move on completion feature be removed from JDunrar and added to Settings - Basics - Download & Connections - General - Download directory. This would add 2 new controls to the UI. "Completion Directory" and "Create subfolder with package name if possible". See Forum http://board.jdownloader.org/showthread.php?t=13333 Relates to expected changes in JD unrar.
