

JDownloader - Feature #12617

Make captcha handling a bit more intelligent

03/12/2014 06:09 PM - pspzockerscene

Status:	New	Start date:	03/12/2014
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	General	Estimated time:	0.00 hour
Target version:	020 - Next Release 2.0		
Resolution:			
Description			
Well, 2 Things: 1. As already mentioned before: If JD notices that the user is away and/or the enabled captcha services do not work -> Disable all links with captchas. Now to the problem, described here: http://board.jdownloader.org/showthread.php?t=55934 Imagine the user is away and a captcha service is active. Now, sometimes it might won't get a response so some links will get a "Captcha skipped" state. The user can remove this manually later. Now my suggestion: As long as JD knows that the solver is still active - because other captchas/downloads work fine - it can re-enable the "Captcha skipped" state for these links after a certain amount of time which should also be adjustable via advanced settings. This feature was requested before already - just not as detailed as I explained it here.
