<b>Target version:</b>	040 - FarfarAway		
<b>Resolution:</b>	Can't reproduce		

#### Description

When a dialog is opened and a 1 line edit box already contains text, the text should be selected.

Example: The Find dialog in the Download page (and the Link Grabber page) is initially empty. After the first search, when the Find dialog is opened, it contains the text from the previous search. This feature requests that the text be selected to make it easier to enter a new search string.
