#### Description

I have a premium account so jdownloader does download multiple files if i set it to do so. Only if i have lets say 2 packages in que and set multiple downloads to 5 and now the first package is almost done, only 5 more files downloading i dowl want the next package start downloading - even if it means that the first package runs only 4, then 3, 2, 1 downloads simultaneously - before the first package is completely finished.
