Category:	General	Estimated time:	0.00 hour
Target version:	040 - FarfarAway		
Resolution:			
Description			
<p>Right now, TV shows are usually packaged as one link per package. Not only does this require users to merge packages in Link Grabber, but it reduces the utility of attempts to skip Link Grabber (such as CNL).</p> <p>The Automatic Assembly regex collection should be changed to include removal of episode numbers from standard Series dd Episode dd specification.</p> <p>Because of the complexity of knowing the correct parse, I am not recommending parsing Series+Episode in the d0d format. The problem is not that it is hard to parse, but it is hard to be sure that this is a series+episode designation. It could be any kind of number.</p> <p>In addition, an assembly name should never end with a file extension. So if this filter is not applied, then an extension filter should be applied.</p>
