Target version:	010 - Next Major Public Release 1.xxx		
Resolution:			
Description			
<p>A well known and recommended series and movies site in Latin America that streams video files from a variety of servers already known to JD like Megaupload, Bitshare and others.</p> <p>Is it possible that adding cuevana's link of each movie or chapter of a series, JD recognizes the urls of the hosters where the video files are stored?</p>
