Description

Bring back package grouping as it was in Nightly/Stable:

With these links added to LinkGrabber:

Link_1_part1.rar

Link_1_part2.rar

Link_1_part3.rar

Link_2_part1.rar

Link_2_part2.rar

I expected to create 2 packages, which names are based on source links/names:

package1: Link_1

package2: Link_2

Now LinkGrabber creates common package: Various Files (<jd:orgfilename> rule for PackageName in Packagizer is ignored?)

Example:

<http://filepost.com/files/a8m864f3>

<http://filepost.com/folder/1db7bm2a>

This should create 2 packages:

"Merlin 01-05"

"Grimm_Fairy_Tales_-_Inferno_01-05"
