Description Right now, if a premium Account doesn't work/is expired/has no traffic left, JD just continues as freeuser. Same is for Multi-Hosters. I'd like to have settings for that, they could look like this: If premium download is not possible: -Resume as freeuser or -Deactivate all links of this hoster (maybe temp. deactivate) If Multi-Hoster download is not possible: -Try download using a local premium account or -Resume as Freeuser or -Deactivate all links of this hoster (maybe temp. deactivate) -->In this case if "Try download using a local premium account" the settings for this "mode" should be used
