Description Just noticed this today: 1. Started to download a big package and left my room. 2. When I came back later the laptop was in standby so I thought JD finished downloading. In fact it did but when I woke it up from standby it continued extraction from ~ 80% - to me it seems like the extraction process did not keep the machine awake so it went into standby while extraction was still running. Please check this. Log: 17.02.16 03.08.20 <--> 18.02.16 00.29.03 jdlog://5715211113541/
