#### Description

could reproduce this bug for user with vista (single monitor, synthetica theme)

maximize window, hit minimize button so its in tray now

rightclick tray and exit

no dialog came

click on taskbar entry for jd, jd will come back to screen but blocked by exit dialog , which is not visible

press escape to close hidden dialog and jd will work again

please check/fix this

maybe dialog is placed outside screen because jd got no focus and is minimized (wrong calculated coords)
