Target version:	
Resolution:	
Description at the moment the MyJD Solver only waits for solution when there is no active/enabled/supported Browser/Dialog-Solver. User can abort the Captcha in Browser/Dialog-Solver and this one should also abort all others -review if the current special handling in MyJD Solver is still required -add support to show a dialog when Browser/Dialog-Solver is disabled. At the moment the user has no option to abort the captcha --add a generic wait for solution captcha dialog if not aborted, so user can abort AND more important, see what is going on
