Target version:	010 - Next Major Public Release 1.xxx		
Resolution:			
Description			
an addon that will prevent windows(maybe other os too) from entering standby when download is running			
for windows you can find sourcecode in tools/standby (from http://www.codeguru.com/cpp/w-p/system/messagehandling/print.php/c6907)			
we need to find a way to load the dll the addon itself should be very simple
