#### Description

<http://board.jdownloader.org/showpost.php?p=266549&postcount=30>

Imagine you have a premium account of a host which supports 3 simultan downloads.

Then you also have a multi-host account active which supports 20 simultan downloads

Now because local accounts are preferred over multi-host accounts, JD will download via the local account but only as long as you set max simultan downloads  $\leq 3$

If you set it to 4, JD will download 3 via the local account and 1 via the multi-host.

I think this is now the desired behaviour.
