Description

JD unpacked the archive (password was set before), then noticed that there are more inside -> Tried to unpack this -> Asked for password although the password for the 2nd archives was the same as before.			
-> Instead of entering the password, I pressed cancel -> Later I wanted to extract the archives via JD -> Not possible because the main archive was already deleted.			
Kurz:			
Laden (davor Passwort setzen) -> JD wird nochmals nach dem Passwort für fragen, da das Archiv doppelt gepackt ist -> Abbrechen			
-> Die neuen Archive lassen sich nicht über JD entpacken - außerdem hätte er auch bei denen nochmal die Passwortliste durchgehen sollen, statt mich zu fragen.			
Ich hoffe das ist verständlich.
