<b>Target version:</b> 040 - FarfarAway	
<b>Resolution:</b>	
<b>Description</b> Combine these two operations into one command, Process archive. This would remove user confusion, eliminate a second-level menu, and take advantage of 7-zip's ability to undo splits.  This is especially important for deep extraction, where there can be splits and compression at different levels.  Relates to expected change in JD unrar to use 7-zip or the 7za library. Forum thread: <a href="http://board.jdownloader.org/showthread.php?t=13113">http://board.jdownloader.org/showthread.php?t=13113</a> assumes this change.
