Notification System - Rewrite

04/04/2010 03:47 PM - scr4ve

Status:	Waiting for Feedback	Start date:	04/04/2010
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	GUI	Estimated time:	0.00 hour
Target version:	040 - FarfarAway		
Resolution:	To be discussed		
Description			
The current popup system needs a rewrite, including the following features:			
1) Support for Growl, Snarl, Prowl (Send notifications to iPhone) and internal notifications. A simple generic interface. to be discussed: Is a plugin system too complex for this case? I think we won't have more than the five different systems.			
2) Notification filter Only display certain notifications (Create notification classes and IDs (as in html/css) for filtering?)			
3) Specific options for each notification system if needed
