

JDownloader - Bug #2611

JD should display dialogues in the desktop or workspace that is currently visible

11/03/2010 10:05 PM - drbits

Description

JD displays dialogues in On-Top mode. However, that is always on the desktop that JD is running in. If the desktop or workspace in use is not the current desktop or workspace, the the dialogue will not be visible (it is like being on top of everything, but the extra tablespots are piled on top of you).
