

## JDownloader - Bug #2804

### Sorting should be Case Independent Unicode order

12/30/2010 08:38 AM - drbits

<b>Status:</b> New	<b>Start date:</b> 12/30/2010

<b>Resolution:</b>	
<b>Description</b> Apparently, sorting is still in one of ISO code page orders.  Case independent sorting is important (I know it is a little slower). Users are starting to expect Unicode ordering and rendition instead of Win-125x. Unicode sorting should be faster, because Java stores Characters in a modified UTF-16 format internally.  When saving text to a log or file, it should be in UTF-8, so characters can be rendered. Alternatively, they can be in \u#### format.
