

JDownloader - Feature #3336

Scheduler addon should support time ranges

04/23/2011 11:23 AM - drbits

Status:	New	Start date:	04/23/2011
Priority:	Low	Due date:	
Assignee:	coalado	% Done:	0%
Category:	Addon	Estimated time:	0.00 hour
Target version:	040 - FarfarAway		
Resolution:			
Description			
Instead of scheduling individual Actions, it would be much more use friendly to schedule Activities to operate over a time period.			
For example, the Activity: Download: schedule from XX:XX to YY:YY is much easier for users to understand than the two Actions: Start Download: Schedule XX:XX and Stop Download: Schedule YY:YY.			
A -1 for a time would mean to ignore that entry. So Download: schedule -1:00 to 23:59 means to Stop downloading at 23:59 (there is no start time given, so there is no Start Download Action).			
If JDownloader is started between the start and end time for an activity, then the start action for that activity would be executed.
