| <b>Description</b><br>add support for it<br>An update is required to support the new retina screen for the mac. A simple fix is to add "NSHighResolutionCapable" key and set it to true in info.plist. This allows the text to be rendered in high resolution and won't affect non-retina users. |                                  |
