Target version:	020 - Next Release 2.0		
Resolution:			
Description			
<p>JDownloader 2 is having problems remembering the routers password, on a users pc no matter how many times Ive entered the router pass, JDownloader wasnt able to do a successful reconnection due to a bug in the password field. Ive also experienced a similar issue with my JD 2 too, but was able to succeed after entering the password in like 10 times and executing random clicks on main JD GUI.</p>
