

JDownloader - Feature #7686

JD2: Add and improve native multihoster support

02/21/2013 05:43 PM - raztoki

Status: New	Start date: 02/21/2013
Priority: Normal	Due date:
Assignee: jiaz	% Done: 0%
Category: Controlling	Estimated time: 0.00 hour
Target version: 030 - Version > 2.xxx	
Resolution:	
Description Add new exceptions to support multihoster specific events. - create an event to return to the next possible download method, without the need to remove getHost() from multiHostSupport array. Retry event specific to a given multihoster, when over a given threshold return to the next possible download method. So that we don't need internal plugin management of retry counts and the need to remove getHost() from multiHostSupport array.
