Target version:	020 - Next Release 2.0		
Resolution:			

Description

Primarily within tables, selection items are not remembered. Please review current code, and improve

to reproduce

test 1: select a group of DownloadLinks, change tabs, go back to original tab, selections are no longer the same!

test 2: selection of links in sort orders are not preserved, for example highlight a grouping of links in default sort order. Toggle the sort order multiple times until it comes back to original sort test order, selection isn't the same!

test 3: when links are adding to linkgrabber, if you are highlighting/selecting (with ctrl or ctrl shift combinations) multiple links and a new link adds (whilst a gui refresh event is under way) it mass highlights.

Original selection states should be preserved in all above tests. Until the user changes it!
