<b>Resolution:</b>			

#### Description

When JD2 is installed on external drive, and comp is idle and goes into Sleep Mode then external drive is disconnected.

After resuming - JD2 still works but only partially - no response from some menu functions, can't exit, can start new downloads but can't stop them, update doesn't start etc.

Only solution to exit is to kill the process.

In Stable the problem was lost connection to database, but what is the problem in JD2? Is it possible to fix it?
