| Description | |
| <p>My idea: Imagine a user has set loads of custom advanced settings but then something doesn't work. There is no way to reset all of them other than deleting the whole config.</p> <p>So my suggestion: In the expert settings add a button somewhere "Reset all to default" -> Confirmation window "This will reset all of your custom advanced settings [Ok, Cancel] -> Ok -> Reset information</p> <p>Just my 2 cents...</p> | |
