Category:	Addon	Estimated time:	0.00 hour
Target version:	040 - FarfarAway		
Resolution:			
Description			
<p>addon that adds rightclick option (optional) and you can set minimum downloadspeed in settings or per file and it will restart file if it drops below speed that user set.</p> <p>this addon should check for resumable flag (only restart if user say to restart non resumable downloads)</p> <p>maybe adding a reconnect feature too, but this can also be done via eventmanager once it is finished</p> <p>also some % number needed when not to restart because there is no sense in restarting a file thats 98% complete ;9</p>
