

JDownloader - Bug #87654

MOCH caching: (alldebrid, premiumize) downloads stuck at 99,99% and CRC check issues

Resolution:	
Description	
Short summary: Some MOCHs use caching to save traffic and be able to deliver files quicker to their users. This will cause the following issues: - CRC failure if another CRC hash was set by original host plugin in linkcheck before - Stop at 99,99% because the final verified filesize slightly differs from expected filesize	
Possible solutions: - MOCH provides correct CRC hash along with downloadurl - Disable CRC check for some MOCH or MOCH API returns flag to tell us whether or not to perform CRC check - (Always?)Trust final filesize provided by MOCH
