

## MyJDownloader Website - Bug #88457

### Deep links should wait for the client to do a reconnect (Unknown JDownloader ID)

06/09/2020 06:11 PM - mrc

<b>Status:</b>	New	<b>Start date:</b>	06/09/2020
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	mrc	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
<b>current behaviour:</b>			
If a deep link is used and the session of the client needs a reconnect (token exception), the device view shows an error message ("Unknown JDownloader ID") and then redirects to the dashboard. example deep link: <a href="https://my.jdownloader.org/index.html?deviceId=fc4df820e5f6eaecf981680e7f317d83#webinterface:downloads">https://my.jdownloader.org/index.html?deviceId=fc4df820e5f6eaecf981680e7f317d83#webinterface:downloads</a>			
<b>desirable behaviour:</b>			
wait for the reconnect, if there is a client exception after reconnect -> show error message, then redirect to dashboard after timeout.
