Target version:	020 - Next Release 2.0		
Resolution:			

Description

If the max. connections per download is set to one and a mega.co.nz file (download finished) is in decrypting process a new download is not started until the decrypting process is finished. The download of the next item should start after the bandwidth is free again and not wait about 5 min until the decrypting process of a mega.co.nz file is finished.
